WINTER
RECREATION
ON PUBLIC LANDS

Facilities

Each winter activity location — whether provincial park, conservation area, agreement forest, or simply a snowmobile trail on Crown land — is shown numerically and by route description.

Telephone numbers indicated can be reached during normal weekday working hours to obtain more detailed information.

Black dots in appropriate columns indicate the kinds of activities available — skating tobogganing, snowshoeing and cross-country skiing, downhill skiing, snowmobiling, fishing, hunting, picnicing and winter camping.

Parking lot areas are cleared of snow in many locations, but keep in mind that snow-clearing crews may have a backlog of work after a heavy snow-fall.

Picnic tables and toilets are available where indicated in the listings. However, tables are usually available in most other locations but may be stacked for winter protection. Feel free to use them.

Winter camping locations are only indicated where specific winter services are maintained — heated washrooms (with hot water), plowed roads and campsites, central fuel wood supply, drinking water and garbage disposal.

Electrical outlets are available in three provincial parks providing winter camping — Arrowhead, Pinery and Sibbald Point. The fourth winter camping park — Rondeau — does not have electrical outlets.

Electrical capacity of an outlet is a maximum of 3,400 watts via 15 and/or 30 amp sockets. When using both receptacles, you can draw a maximum of 30 amps. A special plug is required for the 30 amp socket (available from electrical supply houses. (Ask for CSA designation 685A, 5-30P).

Camping for harder types is, of course, available at many locations. However, apart from primitive toilets, few other facilities are provided and campers are strongly advised to be self-sufficient in fuel, heating equipment, drinking water and garbage disposal.

Litter and garbage disposal containers are provided. Please use them. The removal of litter from the landscape is an unnecessary use of your tax dollars.

Skating, where listed, is maintained on outdoor natural-ice rinks. Elsewhere, skating is possible only when snow and safe natural ice conditions allow.

Snowshoeing and cross-country skiing trails may or may not be marked. Length of hiking trails is indicated in the comments column.

Downhill skiing is most frequently on ungroomed hills without tows. Where tows are available, fees are shown (listing of commercial ski facilities are shown in the brochure, "Ontario Winter Adventures", published by the Ministry of Industry and Tourism, 900 Bay Street, Toronto, and available free of charge).

Snowmobiling areas and trails are operated under a variety of rules and regulations. For example, trails within provincial parks require a minimum snow depth of six inches; within some conservation areas, the minimum required is two inches.

Trails on public lands are usually marked — many with reflective signs for night travel — and include stopover points equipped with primitive toilets, fireplace, picnic table and garbage containers.

Definition of lands:

Conservation areas: Lands owned and managed by the 37 Conservation Authorities in the Province, with funds provided by participating municipalities. The Province of Ontario provides 50% of the cost of land acquisition and development.

Park Commission Areas: Lands managed by the St. Lawrence Parks Commission, the St. Clair Parkway Commission and the Niagara Parks Commission — agencies of the Province of Ontario responsible to the Minister of Natural Resources.

Provincial Parks: Lands managed by the Ministry of Natural Resources, Division of Parks, to provide a wide variety of outdoor recreational opportunities and to protect unique or representative physical, biological, cultural and historical features within the Province.

Agreement Forests: Lands owned by municipalities and Conservation Authorities, managed under agreements with the Ministry of Natural Resources.

Wildlife Management Areas: Public lands managed by the Ministry of Natural Resources to produce and protect wildlife. Hunting may be permitted within all or part of these areas in season.

Recreation Areas: Lands purchased by the Province and managed by the Ministry of Natural Resources for general recreational use. Very limited facilities are provided.

Crown Lands: Lands vested in the Province of Ontario which have never been deeded to private ownership and which are subject to a variety of resource management programs.

Minister's Message:

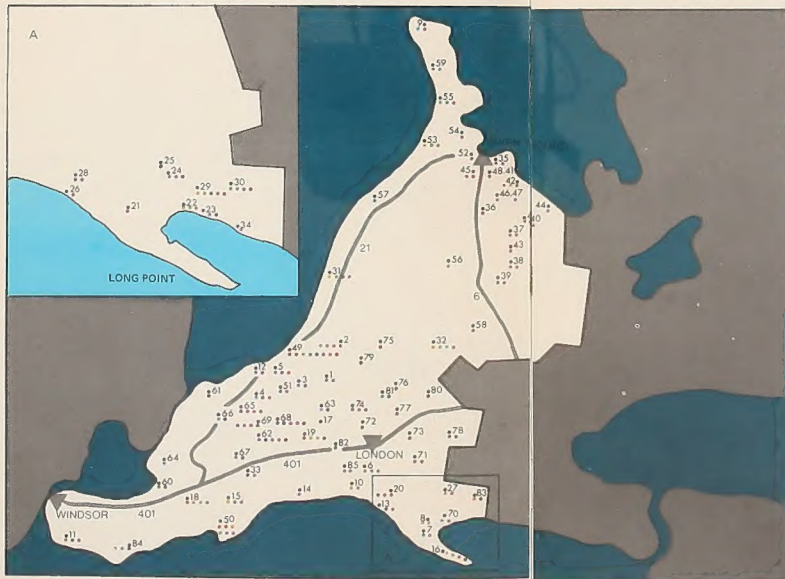

In response to the fast-growing enthusiasm for outdoor winter sports and recreation, I am pleased to present this publication which lists the expanding number of facilities available on publicly-owned lands. I trust that it will assist you in enjoying more fully Ontario's winter recreation opportunities.

Leo Borman
Minister of Natural Resources

A comprehensive guide to some of the most popular winter activities in Ontario's provincial parks, conservation areas and other public lands (prepared for your use by the Ministry of Natural Resources).

For easy reference, locations of winter facilities are listed numerically within six major tourist regions of the Province (map, left). An enlarged map of each region is included to indicate the proximity of facilities to major highways, cities and towns.
